

Key	Historic Flooding Source
SW	Surface Water Flooding
MR	Flooding from Main River
OW	Flooding from Ordinary Watercourse
Sewers	Flooding from Sewers

Historic flooding incidents are based on Worcestershire County Council's historic flooding dataset. This consisted of a point layer of all historic flooding incidents within the Worcestershire area and a polygon layer of hotspots. The hotspots are based on the historic flooding incidents and a buffer applied to allow for any inaccuracy or uncertainty on the exact location of the historic incident. Therefore, it is important to note that whilst a site may be shown as falling within, or partially within, a flooding hotspot, the site itself may not have experienced any historic flooding. This assessment is indicative only.
